

# Risk Management

We're here to help you equate risk management to profit and growth. Our goal is to bring you everything you need to avoid damages, injuries, and losses through on-site consultations, safety programs, training tools, and other resources.

## Strategic consulting

Your Risk Management consultant will ask questions about your business, listen to your concerns, and craft solutions tailored specifically to your safety needs. We will partner with you to create a safer workplace with fewer losses, meaning insurance premium savings for you.

Our consultants are safety experts in a range of industries, including farm and agriculture, manufacturing, construction, food services, and much more.

Our consultative services include:

- Developing risk management programs and recommendations
- Analyzing your claims and loss history to reduce or avoid repeat incidents
- Establishing a written safety policy
- Establishing and evaluating safety committees
- Analyzing your current self-inspection and preventative maintenance programs
- Developing and implementing training programs
- Determining levels of compliance with local, state, and federal codes and regulations

## Online safety resources

As a SECURA policyholder, you have access to a variety of risk management resources to help you prevent losses and improve the safety of your workplace. Use these free online tools to help train your teams. Find them all at [secura.net/safety-resources](https://secura.net/safety-resources).

### Safety Talks

Find free safety talks you can use to enhance your safety training. Our library includes a range of industries and topics that is continually growing.

### Safety Programs

Our risk management consultants can help implement new safety programs or review and update existing programs. Work directly with your risk manager to create customizable templates for programs, forms, and checklists.

### Safety Tips

We have several safety tips and guidelines available on our blog. Share these articles internally with your teams to promote safe practices in the workplace, at home, and even on the road.

### Videos on demand

Enhance any safety training program with free on-demand videos from our partner, Safety Source. Our expansive video library includes hundreds of videos for many industries and categories, including driver safety, construction, manufacturing, agriculture, restaurants, and much more. After viewing these safety training videos, you and your employees can reinforce your knowledge with related quizzes and other supporting materials.

An account is required before streaming videos. Signing up is free and easy — visit [secura.net/safety-resource](https://secura.net/safety-resource) to get started.

### Sign up for safety newsletters

Stay up-to-date on relevant safety topics. Subscribe to our emails to receive safety tips, resources, and news directly to your inbox. Visit [secura.net/risk-management/email](https://secura.net/risk-management/email) or scan the QR code to sign up.

Protection designed for you.

# Risk Management

## Training tools

In addition to the free resources available on [secura.net](https://secura.net), you can access tools like a Learning Management System (LMS) and OSHA training sessions.

### Learning Management System

In partnership with Evolved Safety, we offer a discounted rate for SECURA policyholders to access the SafetySkills Learning Management System (LMS). This robust LMS helps identify training requirements, set goals, track progress, and promote safe workplaces. To learn more, please contact your risk manager.

### OSHA training

Be proactive in your safety practices with OSHA training sessions. Reduce risk and improve safety with 10 and 30 hour training sessions available at a discounted rate. Visit [evolvedsafety.com/secura](https://evolvedsafety.com/secura) to get started.

### Additional resources

Depending on which insurance policies you have with SECURA, you may also have access to additional resources, such as:

- EPLI workplace training, information, and hotline
- Cyber security risk management tools
- Nurse Hotline for work-related injuries
- HelixIntel's Computerized Maintenance Management System (CMMS) to manage work orders, schedules, asset management, and more

If you would like additional training resources or topics not available through any of these resources and tools, please contact your risk manager.

## Partners in safety

Thank you for choosing SECURA and partnering with us to promote a safe working environment for you and your team. Our expert consultants can help design the perfect safety program, answer questions, and so much more.

Visit [secura.net/safety-resources](https://secura.net/safety-resources) to learn more about all of these risk management resources.
