

RANSOMWARE READINESS WITH eRISKHUB®

No organization, school, or business is immune to the risks of ransomware attacks. Be prepared to keep your organization protected.

A new feature of the eRiskHub® portal, Ransomware Resources, is a new section full of ransomware-focused content, including ransomware tools, interviews with ransomware experts, best-practices downloads, and recommended ransomware security solutions. With access to interactive tools and tests, you'll have access to the most up-to-date ransomware resources.

Ransomware by the numbers

Coveware's quarterly Ransomware Marketplace report aggregates statistics such as extortion demands, data recovery rates, and attack vectors.

Ransomware stress test

This no-cost, self-assessment tool helps gauge aspects of an organization's security that a scan can't read (MFA, backup strategy, insurance, etc.) but have great impact on the frequency and severity of ransomware incidents. Based on their result, organizations receive a prioritized list of recommended remediation actions, along with access to a knowledge base that provides more context.

Organizational self-assessment survey

Gauge your organization's implementation or lack of high-priority technical security practices relating to various network, system, and application solutions. These high-priority practices can help mitigate against a variety of high-profile, high-impact exploits that your organization may face from internal and external malicious actors.

Ransomware mock exercise

In this interactive game, watch as a simulated ransomware attack unfolds and make choices along the way regarding the best way to respond.

Interviews with ransomware experts

Forensic, remediation, and regulatory experts who have handled hundreds of ransomware events share their experience and insights in video and written interviews. Topics include:

- Life Cycle of a Ransomware Attack (video)
- RDP Exploits – A Cyber Criminal's Favorite Attack Pathway (video)
- Cyber Risks During the COVID-19 Pandemic
