

ROOF SNOW REMOVAL SERVICES

Adverse weather conditions can affect the structural integrity of buildings and could lead to a partial or complete roof collapse.

To help mitigate roof collapses this winter, we are making available discounted roof snow removal services through RoofConnect, a nationwide roof snow removal vendor, for Farm building risks, as one of our Risk Management services.

Program details:

- SECURA Farm policyholders can receive discounted roof snow removal services through our partnership with a nationwide roof snow removal vendor, RoofConnect.
- Policyholders choose when they need the roof snow removal service. There is no waiting to meet certain guidelines, or for SECURA to deploy the service.
 - Policyholders should contact RoofConnect at secura@roofconnect.com or 877-942-5613 to deploy the service.
- There is no minimum amount of snowfall to trigger the service. It is up to the discretion of individual policyholders based on their assessment of the hazard posed by the current snow load on their building.
- SECURA does not provide policyholder reimbursement for roof snow removal services. Policyholders can always select their own roof snow removal vendor; however, to obtain SECURA-negotiated discounted rates, the policyholder would need to contract services through RoofConnect.

Disclaimer: Discounted Roof Snow Removal Services are intended for certain types of risks and are not a coverage under an insured's policy. Insureds should not rely on any particular service from or through SECURA and should use their best judgement to protect all of their property. These discounts may not be available in all states and may be discontinued at any time without notice at the discretion of SECURA.
