

Maintenance is *hard*. HelixIntel is here to make it *easier* for you.

SECURA Insurance has partnered with HelixIntel to offer HelixCMMS, an easy to use Computerized Maintenance Management System, at no additional cost. The platform gives maintenance teams a centralized way to manage work orders, equipment, and inventory across single or multi site facilities, all from one intuitive system.

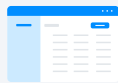

Taking a proactive approach to preventive maintenance helps minimize costly downtime, extend the life of critical assets, and maintain compliance with operational standards. HelixCMMS makes it easier to move from reactive fixes to planned maintenance by simplifying how teams log issues, schedule work, and track progress, while reducing paperwork and manual processes.

How HelixCMMS Supports Maintenance Teams:

01

Work Order Management

Create, assign, and track tasks for equipment repairs, routine inspections, and scheduled maintenance activities.

02

Preventive Maintenance

Schedule recurring tasks and automate reminders to help reduce downtime and keep equipment and safety checks on track.

03

Asset Management

Maintain detailed records of all critical equipment and assets to maximize performance, improve reliability, and extend their operational lifespan.

04

Location Reservations

Reserve shared spaces like conference rooms, event spaces, and more to avoid scheduling conflicts and keep operations running smoothly.

By streamlining operations and eliminating distractions, **HelixCMMS empowers teams** of all sizes to stay focused on what matters most: **productivity, efficiency, and long-term success.**
